Gielgud Theatre

Project Specifications

Product Specified: NRES.16

Colour Specified: Black

Sector: Entertainment

Project Description

Genesis has recently installed NRES.16 at the Gielgud Theatre in the prestigious Shaftesbury Avenue in London. The resin has been used for their front box office steps to increase visual awareness and add anti-slip properties to the busy Theatre without distracting from the ornate Victorian design.

The resin blends in perfectly to it's surroundings and looks like it has been part of the original build.

The steps required templating and bespoke stencils creating to match the curved design of the steps and we are pleased that the Theatre trusted Genesis with the project.
