

Case Study - Health & Beauty

L'Oréal HQ, Singapore

Project Specifications

Product Specified: ASL15 & ASL30

Sector: Health & Beauty

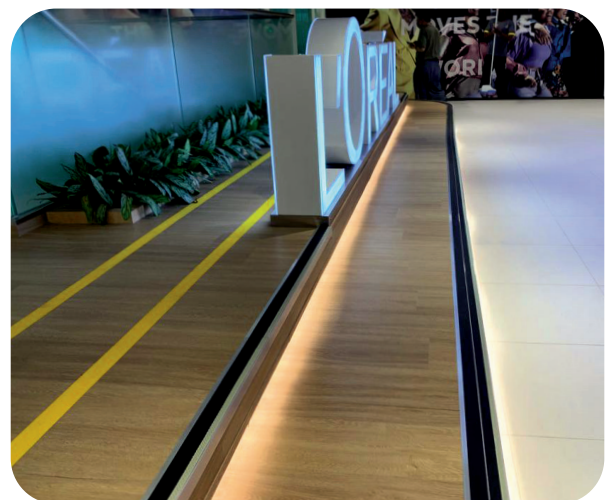

Project Description

L'Oréal is the world's largest cosmetics company and now has this stunning HQ in Singapore!

Our ASL 15 and ASL 30 went through a special fabrication to allow curves for this project.

This created awareness of the step edge, with the added photo luminescence feature to light the edge of the step in an emergency situation with low level of lighting.

Our distribution partner Floorspec in Singapore helped provide this solution.
