Stainless Steel Cutting Blade - Single Block

Product Description

Cut-off wheel for steel and stainless steel (INOX) with high cutting performance and an excellent tool life. Specially optimised for use on thin sheets and profiles.

Maintenance

Stainless steel is a corrosion resistant chromium/nickel alloy steel that is strong and durable with excellent lustre. However, it is not rustproof, particularly in the harsh environment of a swimming pool. Chlorine and bromine used for sanitization are highly caustic chemicals for stainless steel and heat and humidity enhance the corrosiveness of these chemicals. Regular cleaning is the best way to prevent corrosion and add to the service life for your profiles and any other stainless steel equipment. The goal of your cleaning and maintenance program should be to keep the stainless steels protective Chromium oxide layer intact. This is what prevents corrosion. Varying Stages of contamination.

Where to use

Excellent tool life on thin sheet metal and profiles thanks to wear-resistant bond system.

Universally suitable for steel and stainless steel (INOX).

Fast work progress thanks to high cutting performance.

Perfect for cutting out holes, cutting of thin sheet metal and profiles and general cutting.

Technical Info

Max. RPM	13300 RPM
Dia.	115 mm
Width	1 mm
Centre hole dia.	22.23 mm
