

BIHUI

Genesis

For the Perfect Finish

BLFTGP

Operating Instructions Please read before using

For positioning and fine-tuning of large-format and heavier materials with a smooth surface, such as ceramics, stone, granite, plastic, metal and glass.

6 pcs suction cups.

Stepless span between 170 - 225 mm.

Width: 350 mm.

Length: 655 mm.

Placement of large tiles or other heavier materials is impossible to influence hand, e.g. a large plate that is placed on the fix is sucked directly into the substrate.

With the BIHUI BLFTGP, the placement of the plates can be simple and finely adjusted. The suction cups are attached to the plates and with the help of the piston they are forced to the desired position.
